Bred and selected among avocado trees, it is at home with papayas and managos yet thrives in the winters of Chicago, Montreal, and the Bavarian Alps where it won a performance test over top iris from all of the world for its ability to produce long lasting flowers in great abundance on newly set plants. In 1959 the Aril Society International and The American Iris Society established the C. G. White award as a medal given annually for the best aril-bred iris in commerce. Mary McClellan won the first medal with no close rivals. Highly respected by experts, it was not widely known; we have had no stock to distribute. THE ABSOLUTE MOSTEST

Iris or daylilies for your money. We've got a bear by the tail. We grew tremendous numbers of plants for wholesale orders. Growth has been fabulous and we have extra plants of superbly grown first year stock. Here's a

way to buy top varieties superbly grown and carefully selected at lowest prices for you folks who want to spread a dollar over a lot of ground. \$15.00 for 100 labeled plants - at least 30 different. These catalog well over \$100.00 per hundred. (Express charges collect.) Unlabeled collections from older plantings \$6.00 per 100.

- ★ ADAM** (Craig'62) **\$25.00**
This huge burgundy red iris is one you will soon know better. It was first selected because of the fine big plant, the rich color and the quality of the big full flower that is born on strong widebranched 40" stems. It has proven to be unusually floriferous in season with good rebloom as well. Vigor and increase are exceptional. It set enormous full pods to each of the few test pollinations put on it; and germination appeared 100%. The first flowering of this small lot of seedlings indicates it is our top red seed parent. We just succeeded in crossing it both ways with a great variety of reds, oncobreds, plicatas, dwarfs, etc. We have great confidence in it.
- ARAKS** (Tim Craig'62) **\$15.00**
This light red aril bred blend with dark petunia violet beard gives this great beauty combined with novelty. Strong color and heavy bloom make a fine color mass. It is introduced, however, more for great beauty of the novel combinations of smoothly blended colors: Rhododendron, old lilac, rose, bronze and prune enhanced by dark violet beard.
- BIBELOT** (Willbanks'62) **\$7.50**
This very low growing black iris is extremely floriferous and far more vigorous with us than other blacks we grow. It's a very smooth violet black with blue beard. It makes a very fine border plant with 15" compact foliage. The nicely branched 20" stems display the 5" blooms just above the foliage. Black Orchid X Storm Warning.
- BIG SUR** (Craig'62) **\$35.00**

- NOAH** (Tom Craig'62) **\$25.00**
